

## Eat or be eaten!

It can be hard to survive in the African Savannah. Large carnivores are always on the hunt for prey and many herbivores compete for grass and trees to eat.

**Read** the fact sheets for the animals below and **describe the adaptations** that help them avoid being eaten or help them to get food. (Bonus points if you can do both!)

	Adaptions to find food	Adaptations to avoid being eaten
African Painted Dog		
African Lion		
Giraffe		
Slender-tailed Meerkat		
Zebra
